Jennifer,

Please take a moment to check out the link included within Bridget's email below. After reviewing the two minute or less video, explain to me why the VB/I-70 Superfund Site folder at the Valdez Library in Elyria is devoid of information pertaining to OU1 and to its pending deletion.

Bridget, Joan, Christine, me and others have REPEATEDLY inquired about site information being kept within the local repository. Over and over and over again you've told us that the folder at the Valdez library was maintained with site documentation. On multiple occasions Joan and Bridget checked on that folder, each time finding only a couple of sheets of paper and this time some discs on OU2. As there are many homes within Elyria & Swansea that will be impacted by this delisting it's important that neighborhood residents have the opportunity to learn about the site and the delisting.

As the community relations contact for this site you've done a disservice to neighborhood residents by neglecting the required information repository. What will you do to ensure this folder is updated with the required OU1 documents, those included within the delisting application, by Friday of this week?

Regards,

Kim Morse
